PROFESSIONAL SUMMARY

Results-driven MCA graduate with strong analytical and technical skills in data analysis, visualization, and reporting. Proficient in SQL, Python (Pandas, NumPy), Excel, Power BI, and Tableau. Experienced in cleaning and transforming raw datasets, performing exploratory data analysis (EDA), and building interactive dashboards that convert data into actionable business insights. Eager to contribute to data-driven decision-making in a fast-paced MNC, IT company, or startup environment.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy) • SQL • MySQL

Data Visualization & BI Tools: Power BI • Tableau • Excel (Pivot Tables, Charts, VLOOKUP)

Data Analysis & Techniques: Exploratory Data Analysis (EDA) • Data Cleaning & Transformation • Dashboard Creation

Statistics & Analytics: Descriptive Statistics • Trend Analysis • KPI Tracking • Business Intelligence

Other Tools: MS Office Suite • Google Sheets • Jupyter Notebook • VS Code

PROJECTS

Sales Data Analysis Dashboard | Tools: Python, SQL, Excel, Power BI

- Analyzed 10,000+ sales records using Python (Pandas) and SQL to extract revenue, profit margin, and growth trends across product categories and regions.
- Designed and deployed an interactive Power BI dashboard visualizing top-performing products, city-wise revenue breakdown, and monthly profit trends, reducing manual reporting time by ~60%.
- Identified 3 key business insights including underperforming SKUs and high-revenue cities, enabling data-backed recommendations for resource allocation.

Customer Churn Analysis | Tools: Python, Tableau, Power BI

- Cleaned and preprocessed a dataset of 5,000+ customer records by handling missing values, duplicates, and outliers using Python (Pandas, NumPy).
- Conducted EDA to identify top churn drivers including low engagement scores, contract type, and tenure — achieving a churn pattern accuracy of ~85% through statistical analysis.
- Built an interactive Tableau dashboard with churn rate by segment, customer risk heatmap, and retention KPIs, providing actionable insights to improve retention strategy.

Expense Tracker Data Analysis | Tools: Python, Excel, Pandas

- Collected and structured 12 months of personal expense data; performed end-to-end data cleaning and categorization using Python and Excel.
- Identified top 5 spending categories contributing to 78% of total monthly expenses through aggregation, pivot analysis, and Pareto charting.
- Generated monthly trend reports with visual charts and summary tables, delivering clear insights into spending behaviour and budget optimization opportunities.

EDUCATION

Master of Computer Applications (MCA)

University Name, City | Graduation Year: 2024

Bachelor of Computer Applications (BCA) | University Name, City | 2022

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google / Coursera
- Microsoft Power BI Data Analyst (PL-300) — Microsoft Learn
- Python for Data Science and Machine Learning Bootcamp — Udemy
- SQL for Data Analysis — Mode Analytics / Coursera
- Tableau Desktop Specialist — Tableau / Simplilearn (In Progress)

SOFT SKILLS

Analytical Thinking ▪ Problem-Solving ▪ Data Storytelling ▪ Attention to Detail ▪ Team Collaboration ▪
Communication ▪ Adaptability ▪ Continuous Learning

Open to Full-Time Roles, Internships & Remote Opportunities • Available to Join Immediately
